# PACVOID FILL

## VOID SYSTEM

**ENVIRONMENTALLY FRIENDLY  
DURABLE VOID FORMER**

## PRODUCT DATA SHEET

**DESIGNED & MADE IN  
AUSTRALIA**

- ✓ ENVIRONMENTALLY FRIENDLY
- ✓ NO SCRAP COLLECTION
- ✓ REDUCED TRANSPORT COSTS
- ✓ PRICE COMPETITIVE
- ✓ POOR WEATHER DURABILITY
- ✓ NO MESS

Developed and manufactured in Brisbane, PacVoid is comprised of an inner recycled cardboard core wrapped in an outer membrane (UNICOR®) which is waterproof and UV resistant, making PacVoid Fill extremely strong and durable for Australian conditions - 100% recyclable and 100% water-resistant.

Utilising UNICOR® which is an environmentally friendly material comprising of 60-80% calcium carbonate with 20-40% HDPE ensures durability to handle tough Australian weather conditions. This prevents premature breakdown while enabling fast and efficient concrete placement. A small puncture of the outer membrane at time of concrete placement enables the decomposition process to begin.

### **PACVOID FILL - COMPRESSIVE LOAD DATA TEST**

<b>PRODUCT</b>	<b>SIZE (mm)</b>	<b>PEAK FORCE (kN)</b>	<b>AVG. FORCE (kN)</b>
<b>PACF75</b>	<b>75 x 1050 x 1050</b>	<b>53.5</b>	<b>51.1</b>
